

Novelty - special rubber drum with IP67

Protection against temporary submergence*

GT 310.WS3-IP67

Our new GT 310.WS3-IP67 has the protection class IP67 for the entire drum and therefore it's ideally suited for safe use in wet areas.

The temporary submergence* of the entire drum body poses no danger to man and the environment.

Areas of application for these extremely robust special rubber drum are for example rescue forces (fire brigades, German Federal Agency for Technical Relief, civil defense) mining, military, shipbuilding etc. .

- ✓ IP67 protection against temporary submergence*
- ✓ 3 waterproof earthed sockets 2-pole + E, 16A, 230V
- ✓ waterproof plug mounted at the end of the cable
- ✓ with bayonet lock
- ✓ high temperature resistance
- ✓ for outdoor use
- ✓ thermal circuit breaker
- ✓ different cable length available
